

## QUESTIONNAIRE

### Calculation of the cost of construction and installation work

Date:

« \_\_\_\_\_ » 20 \_\_\_\_ y.

An object: Territorial location of the object \*

Customer:

Customer's field of activity:

The contact person  
(Name, position, tel.) \*:

Responsible manager (Name / tel. / E-mail)  
Name of the mounted equipment \*

\*\* required field

#### Types of work performed (mark as required)

Installation of equipment (with earthen and concrete work)	Installation of metal structures
Installation of equipment (without earthen and concrete works)	Roofing
Excavation	Relocation of engineering networks (dismantling the old one and installing the new one)
Monolithic (concrete) work	Arrangement of new engineering networks
Installation of on-site networks / technological piping of equipment (required specify diameter and length)	Electrical work (installation electrical equipment, ShU, electrical connection, grounding)

#### Availability of documentation (mark as required)

Master plan (master plan of the construction site)	Geotechnical results research
Project stage "P"	Hydrological engineering results research
Project stage "R"	Technical task for construction
Estimated documentation	Bill of quantities (BOQ, defective statement)

If there are no results of geological and hydrological surveys:

Groundwater level discovered at depth \_\_\_\_\_ m/ not detected

Soil type: \_\_\_\_\_ (sand, sandy loam, clay, loam, rocky)

Time of work: summer winter

Additional requirements:
